

Sifnos, Milos and Kimolos: wonders of the Cyclades

Sifnos

Trip code: CYCGP0017

Guided hike

• Hiking • 8 days

To the west of the archipelago, these three islands, clearly visible from each other, nevertheless display such contrasting faces that we never stop going from discovery to discovery during our trip. Take Sifnos, the greenest of the three. Between imposing peaks and beaches where the hours languish, we go up beautiful valleys often shaded by following extraordinary traditional paths, superbly maintained. Sifnos is in the pantheon of islands dedicated to hiking. Hiking - yes - but in landscape...

Highlights

1. The striking contrast between 3 islands: Sifnos, El Dorado for hiking, Milos and Kimolos, volcanic islands with dazzling landscapes!
2. The alliance between sea, mountains, and the charm of the Greek way of life.
3. Less frequented and more authentic islands than other famous destinations in the Cyclades archipelago

D2 Piraeus - Sifnos

In the morning, ferry to **Sifnos** (2h30 to 3h). Certainly one of the most interesting islands for hiking: the routes are superb linking traditional villages to dream beaches, passing through hilltop churches (Sifnos has 370 churches and chapels!). Installation in **Kamarea**, in front of a beautiful beach for 3 days. After the picnic, transfer to the village of **Apollonia** (15min); direction **Artemónas** and its cobbled streets lined with bougainvillea then traditional paths lead us down to the chapel of Panaghia Poulati, above the sea. We follow the coast to the village of Kastro, the former capital of the island overlooking the sea. The stroll along typical alleys prolongs the pleasure of discovery. Then we go up to **Kato Petali and Apollonia**. Return to Kamarea by the regular bus (15min). Dinner and overnight in Sifnos.

Then we discover the monastery of **Panagia Chrysosopigi** which juts out beautifully into the sea on a rocky tongue. End of the hike at Platys Gialos beach for a well-deserved relaxation. It is possible to extend the hike to Apollonia through the interior of the island, following irrigation canals passing through **the monastery of Vryssi** and the village of **Exampela** where the chef Nikolaos Tselementes was born (1st half of 20th century), very famous in Greece. D5 Sifnos / Milos: Fylakopi - Sarakiniko - Mandrakia

From **Kamares**, we go up the slopes of Mount Profitis Ilias, passing through old mines, to still enjoy the magnificent Sifnos. Transfer to **Fylakopi** (15min), the starting point of the hike, and a **major archaeological site** that has revealed important vestiges of the Cycladic civilization. Then we follow the coast in sumptuous landscapes combining volcanic rocks and sedimentary rocks until **Sarakiniko**, passing by the pit of **Papafranga** with transparent water, and the small natural ports of **Pachena and Mytakas** before the picturesque port of **Mandrakia**. Depending on the season and the weather, boat times between the two islands are subject to change. If the ferry leaves from Sifnos earlier in the morning, the planned hike to this island could not take place. The climate of the islands is Mediterranean, which is to say hot and dry in summer and mild and rainy in winter, but with significant differences depending on the regions and archipelagos. The Cyclades regularly suffer from lack of rain and during the beautiful season, which lasts here almost 6 months, precipitation is scarce or even completely absent from the end of May to the beginning of October. The Cyclades also benefit from relatively cool summers (for Greece) thanks to the famous "Meltemi", a seasonal wind which during the beautiful season refreshes the atmosphere pleasantly, but which sometimes gets carried away to the point of immobilizing the boats in the port. for a few hours.

Land of myths and sailors

There is not a place, not a Cycladic rock that legends have not clung to.

Mythology steadfastly affirms the Ancients' attachment to the sea and its islands - and, at the same time, the awe of this world on the fringes of the world. Poseidon, accompanied by his retinue of monsters and marine deities, tritons, and nereids, himself embodies this power, this fascination mixed with fear. It was he who, with a blow of his trident, would have made the Cyclades emerge from the foam.

It is a mortal, however, who gave his name to the sea which bathes them: Aegeus, father of Theseus, who rushed into the waters believing his son had been devoured by the Minotaur. Ulysses comes again, with his mythical Odyssey, to exhale the links of Greece to this coming and going of the wave that embraces and invades him like a lover.

The current of history has long sought to wrest the Cyclades from Greece. Conquerors came from all over: Barbarians, Venetians, Franks, Turks. The country's center of gravity has shifted towards the mainland. But the link to the sea has never been erased. In fact, the numbers say it, all of Greece lives on or against the waves. A fifth of its territory is scattered over the blue of the Aegean, Ionian and Cretan seas.

A capricious God has sown more than 2,000 islands there - nearly 10,000, if you count all the rocks, flush with the surface. They are also so numerous, the coastline so jagged, that the country alone has as many coasts as the United States! The Cyclades, on the other hand, group together 39 islands, organized into four constellations (north, center, south, and west), 24 of which are inhabited. So many miniature worlds, with their own history and traditions.
