You only need to be in a sheltered cove or bay (or on the right side of the island) to not feel the effects.

Weather

The Cyclades regularly suffer from lack of rain and during the beautiful season, which lasts here almost 6 months, precipitation is scarce or even completely absent from the end of May to the beginning of October.

The Cyclades also benefit from relatively cool summers (for Greece) thanks to the famous "Meltemi", a seasonal wind which during the summer season pleasantly refreshes the atmosphere, but which sometimes gets carried away to the point of immobilizing the boats in the port for a few hours.
